MCC ENVIRONMENTAL POLICY

By this policy MCC Ltd recognises its responsibility towards the continuous protection of the environment, and issues this statement as a commitment of both management and employees to minimising the environmental impact of its operations.

We are committed to do all we can to comply with and, where possible, to better codes, consents and directives issued as local, national and European directives and to ensure that all of our activities are conducted in accordance with sound environmental practices.

We will achieve this by:

Educating and training employees in environmental issues and the environmental impact of their activities

Reducing the creation of waste by the adoption of improved operating practices and by the recycling of materials whenever practical

Ensuring all waste and effluent is disposed of in a safe and responsible manner

Completing formal legal compliance documentation and checks (responsibility of environmental officer)

Operating in a socially responsible manner and continually monitoring our environmental performance

Internal Environmental audits for each site and externally audited by Apple UK

Minimising the consumption of natural resources and energy, whilst consuming material goods in moderation

Where necessary investing in the development of new products and processes that have an improved performance regarding their impact on the environment

Monitoring the environmental performance of all our main suppliers

Monitoring of government web sites for managing environmental updates
