Sustainability Statement

Micro Computer Consultants (MCC) are committed to providing a high-quality service that is sustainable and which aims to minimise the environmental impacts of our operations.

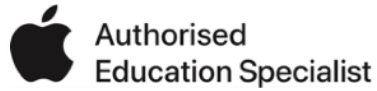

To meet our environmental commitment, we will:

- Meet and, where possible, exceed all current and future European and national environmental legislative and regulatory requirements.
- Reduce environmental waste
- Measure and take action to reduce the carbon footprint of our activities
- ensure our buildings and services are able to adapt to environmental change
- Monitor, manage and minimise our water and electricity usage
- Minimise travel where necessary
- Increase recycling
- We will ensure we consider any environmental factors when planning the procurement of goods and services.
- Encourage and develop our employees, volunteers, partners and stakeholders to conduct their activities in an environmentally responsible manner.

To ensure we meet our commitments, we undertake to periodically monitor and review our environmental performance and take corrective action where necessary.

Sustainability at MCC Digital

MCC is committed to addressing sustainability and has developed a vision statement and associated goals to move us in this direction.

Vision and Goals

MCC is committed to addressing environmental sustainability.

In order to implement this vision the following goals have been developed:

Goal 1: Evaluate our use of energy, water and waste generation and take action to meet and, where possible, exceed targets determined by the Government

Goal 2: To lead by example with the promotion and demonstration of environmental sustainability values.

Goal 3: Educate our staff and partners on sustainable issues.
